

FSG 528SF Alfalfa

Characteristics

Fall Dormancy.....5.0
 Winter Survival.....2.0 (Very Good)
 Recovery After Cutting.....Extremely Fast

- New-Latest generation alfalfa with StandFast™ Technology Traits
- Maximum forage yield, high forage quality
- Easier harvest
- Extremely fast regrowth after cutting
- Greater standability to mid-bloom
- Excellent stand persistence

FSG 528SF represents the latest generation of alfalfas with the StandFast™ technology traits which combine significantly improved standability through mid-bloom and 3 to 5 days faster regrowth when compared to conventional alfalfa varieties. FSG 528SF's extremely fast recovery means 4 to 6 inches more growth in the first 21 days after harvest. This can reduce the number of days to the next harvest as well as maximizing total season-long yield and quality. FSG 528SF's improved standability allows it to remain upright, preserving valuable yield and quality, in conditions where conventional alfalfa varieties lodge resulting in lost profit. This new alfalfa offers maximum forage yield, persistence and a complete pest and disease package. FSG 528SF is recommended for alfalfa growers who manage their alfalfa on a three to five cut harvest system.

DISEASE/INSECT/NEMATODE RATINGS

Bacterial Wilt	Highly Resistant (HR)	5*
Fusarium Wilt	Highly Resistant (HR)	5*
Verticillium Wilt	Highly Resistant (HR)	5*
Anthracnose-Race 1	Highly Resistant (HR)	5*
Phytophthora Root Rot	Resistant (R)	4*
Aphanomyces-Race 1	Resistant (R)	4*
Wisconsin Disease Index	28 out of 30	
Pea Aphid	Resistant (R)	
Potato Leafhopper	Not Rated (NR)	

*Based on the Wisconsin Disease Rating Index.
 This is a 1 to 5 ranking with 5 being the best.
