

Extend Orchardgrass

- Superior yield
- Late maturity
- Stem Rust resistance
- Great palatability
- Perfect for alfalfa or clover mixtures
- Increased stand persistence
- Excellent plant vigor
- Responds to irrigation
- Mixes well with other species adapted to intensive grazing

15-20 #/Acre Alone
3-6 #/Acre in Mixes

Marathon Reed Canarygrass

- Leafy, high-yielding, perennial forage grass
- Widely adapted
- Persistent
- Performs well on wet, poorly-drained soil and soils with a pH below 6.0
- Very drought tolerant variety that can be used for hay, silage or pasture
- Low alkaloid

12-14 #/Acre Alone
6-8 #/Acre in Mixes

Boost Per Ryegrass

- Superior yields of high-quality forage
- Forage is highly palatable, digestible and nutritious for all livestock
- Extremely high animal performance from pasture or silage
- Persistent
- Vigorous, dark-green plants with high disease resistance
- Excellent seedling vigor for fast establishment of dense stands
- Endophyte-free

30-40 #/Acre Alone
4-8 #/Acre in Mixes

Summit Timothy

- Superior for hay or grazing
- Early maturity
- Great palatability
- Perfect for pure stands or with legumes and other grasses
- Improved summer regrowth
- Excellent spring vigor
- Superior leafiness
- Very winter hardy

8-10 #/Acre Alone
2-4 #/Acre in Mixes

DH-3 Annual Ryegrass

30-40#/Acre Alone
4-8#/Acre in mixes

- Quick establishment
- High yielding
- Consistent forage yield throughout season
- Consistent forage yield throughout season
- Excellent palatability
- Good crown rust resistance
- Improved cold tolerance
- Good transition back to warm-season grasses

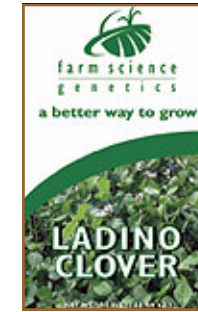

Peak Bromegrass

15-20 #/Acre Alone
5-10 #/Acre in mixes

- Superior vigor
- Winter hardy
- Persistent
- Outstanding dry matter yields
- Highly resistant to foliage diseases
- Excellent seed quality
- Quick recovery after cutting
- Highly palatable
- Developed by Cornell University

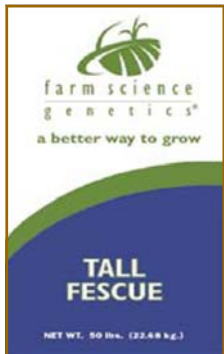

Pinnacle Ladino Clover

6-8 #/Acre Alone
2-4 #/Acre in mixes

- Resistant to leaf diseases and field viruses
- High forage yields
- Ideal for pastures
- Superior persistence
- Excellent seedling vigor
- Aggressive stolon activity
- Drought tolerant
- Widely adapted

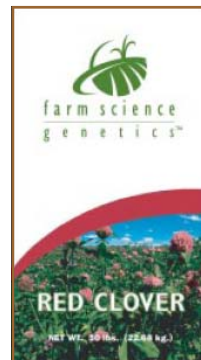

Enhance Tall Fescue

15-20 #/Acre Alone
6-8 #/Acre in Mixes

- High-yielding, endophyte-free
- Excellent hay and pasture variety
- Perfect for winter stockpiling
- Very good persistence and drought tolerance
- Wide area of adaptation
- Better nutritive value than other cool season grasses

FSG 9601 3 Yr Red Clover

12-14 #/Acre Alone
6-8 #/Acre in Mixes

- High Yield
- Un-matched Forage Quality
- Excellent Disease Resistance
- Superior Persistence
- High Resistant to Northern & Southern Anthracnose & Powdery Mildew

Resolute White Clover

6-8 #/Acre Alone
2-4 #/Acre in Mixes

- Outstanding persistence
- High forage production
- Designed for continuous and rotational grazing systems
- Aggressive stolon activity
- Excellent seedling vigor
- Improved drought tolerance
- Widely adapted
- Winterhardy
