

SILOBUSTER PLUS

SILOBUSTER PLUS A BLEND OF LC 6040 FORAGE PEAS/CALIBER OATS

LC 6040 Forage were tested for forage yield and quality in a comparison test with Trapper Peas. The results speak for themselves, when compared in a side by side trial.

GENOTYPE	SEEDS PER lb.	VINE LENGTH (inches)	DM YIELD t/a	CP %	ADF %	NDF %	MILK YIELD lb/ac
Trapper	3189	34	1.88	22.5	31.2	37.5	3879
LC 6040	3225	39	2.44	23.8	32.9	39.7	4735

LC 6040 Features are:

- ◆ Seed Quality **LC 6040 peas have a tougher seed coat than Trapper peas.
- ◆ Dry Matter Yield **LC 6040 peas have longer vines, larger leaf surface, giving higher yield, more milk.
- ◆ Stand Establishment **LC 6040 peas emerge faster, especially in cooler soils. The LC 6040 seed coat contains a more effective metabolic system that imparts the ability to germinate and emerge more rapidly, when soils are wet or cool.

Combine LC 6040 features with a superior brand of Caliber OATS, and the results will satisfy any discriminating dairy or beef producer. In some comparison tests the following observations were made:

	Days to Harvest	Ht. in.	DM t/a	CP %	ADF %	NDF %	Milk Yield lb/ac
Trapper/Ogle	61	33	2.37	17.9	37.4	50.3	3040
LC6040/Caliber	64	35	2.83	18.9	35.4	47.7	4019
Packer/Royal	65	35	2.88	19.1	35.9	49.1	4197

Seeding Rate:

120 lbs. / Acre overseeded with Alfalfa
150 lbs. / Acre alone
