

Low Grow Mixture

This special blend was created specifically for those areas where low maintenance is a must such as hillsides, deep roughs on golf courses, RV parks, cabin, or for planting with wildflower mixtures. Mow only 1-2 Times a year for a beautiful area.

6-8 lbs per 1000 sq ft new lawn seeding

3-4 lbs per 1000 sq ft est. over-seeding

- 30% Viking Hard Fescue
- 30% Azure Sheep Fescue
- 30% Ambrose Chewings Fescue
- 10% Perennial Ryegrass

ESTABLISHING A NEW LAWN

1. **Test Soil for pH and nutrient content.**
2. **Till or Loosen the soil. Rake and remove debris such as grass clumps and small stones, leveling out any uneven areas in order to insure proper seed to soil contact.**
3. **Spread Grass Seed evenly over the area without skips or misses. A more uniform application can be made with broadcast (rotary) type spreaders by spreading half the required amount over the area and then applying the remaining half at right angles.**
4. **Lightly Rake or Roll the soil surface to ensure good seed-soil contact. This contact is critical for proper germination and establishment.**
5. **Apply a starter fertilizer.**
6. **Water areas frequently (several times a day) with a mist or light spray to insure uniform emergence. It is extremely critical that young seedlings not be allowed to dry out. The soil surface needs to be constantly moist until the seedlings are approximately 1" in height. About that time, watering should become deeper and less frequent. One inch of water every 2-3 days is optimum until grass has been cut three times. At that time, 1" of water per week is ideal.**

La Crosse Premium Lawn Mixture

Same as: Palmer's Pride Full Sun

La Crosse Premium Lawn Mixture is a mixture of turf grasses designed to perform in all locations from full sun to partial shade. Perfect for all landscaping demands using improved varieties which are more heat and wear tolerant. It's versatility has made it our best used mixture.

5-6 lbs per 1000 sq ft new lawn seeding
3-4 lbs per 1000 sq ft est. over-seeding

- 15% Ginney Kentucky Bluegrass
- 15% Apollo Kentucky Bluegrass
- 10% Dragon Kentucky Bluegrass
- 10% Diva Kentucky Bluegrass
- 20% Foxy Creeping Red Fescue
- 20% Panther GLS Perennial Ryegrass
- 10% Palmer IV Perennial Ryegrass

All Purpose Mixture

Same as: Palmer's Pride Sun & Shade

All Purpose is a more economical mixture of bluegrasses, fescues, and perennial ryegrasses. This durable turf grass mixture was designed to perform well in all locations from full sun to partial shade. All Purpose is an excellent choice where more expensive or higher maintenance mixtures are not required.

5-6 lbs per 1000 sq ft new lawn seeding
3-4 lbs per 1000 sq ft. est. over-seeding

- 25% Guinness Kentucky Bluegrass
- 25% Atlantis Kentucky Bluegrass
- 30% Vail II Perennial Ryegrass
- 20% Foxy Creeping Red Fescue

La Crosse Premium Shade Mixture

Same as: Palmer's Pride Shady

La Crosse Premium Custom Shade Mixture was developed for those difficult to establish light to heavily shaded areas. It contains only the best shade tolerant fescues and bluegrasses, which will provide excellent shade performance with great color and disease resistance. This mixture also performs in dry soils where poor fertility may be an issue.

5-6 lbs per 1000 sq ft new lawn seeding
3-4 lbs per 1000 sq ft est. over-seeding

- 35% Foxy Creeping Red Fescue
- 20% Ginney Kentucky Bluegrass
- 20% Palmer IV Perennial Ryegrass
- 15% Ambrose Chewings Fescue
- 10% Apollo Kentucky Bluegrass

Quick & Thick Lawn Mixture

Same As: Palmer Pride Rapid Grow

An excellent and economical way to provide a wear-tolerant and durable turf. Priced right to meet budget demands, while still providing a quick-establishing turf cover.
