- Fantastic early season, annual plot
- Can be planted in August and September for grazing during bow season

**Seeding Rate**  
Broadcast or drill: 100-120 lbs per acre  
**Packaged in 50 lb bags**

Plant PlotSpike™ Forage Oats at 100 lbs. of seed per acre. Apply at least 300 lbs of 13-13-13 or equivalent at planting. PlotSpike™ Forage Oats respond very well to high nitrogen fertilizers like ammonia nitrate (34-0-0) applied after the plants emerge. You can apply 150-200 pounds of 34-0-0 every 45 days and not harm your plants. In our seed fields we use the equivalent of 800 lbs of ammonia nitrate per growing season.
