

# Tacking Agent 3®

- Proven to reduce soil erosion and water runoff immediately after hydro-seeding—no cure time required
- Contains the known nocculant polyacrylamide
- Contains hydro-colloid polymers for enhanced fiber to soil bond
- Increases the water holding capacity of all types of hydraulic mulches
- Enhances seedlings emergence and turf establishment
- Assists in germination during heat and stressed conditions
- Contains a marker dye for easy metering of the sprayed area
