

Hydro-Blanket®

BFM

- Hydro-Blanket® BFM (Bonded Fiber Matrix) is available for your toughest jobs, delivering a much higher level of performance than any standard hydraulic mulch on the market today
- Hydro-Blanket® BFM is ideal for projects where blankets are impractical and/or too expensive and conventional hydraulic mulches are ineffective
- Independent testing and years in the field prove Hydro-Blanket® BFM is effective on the steepest, roughest sites—a critical consideration for Phase II compliance
- Produced from Thermally Refined™ wood fiber and combined with 10% cross-linked hydro-colloid tackifier, Hydro-Blanket® BFM applies more easily, promotes faster germination and minimizes sediment and water runoff. Its performance is comparable to blankets, yet its cost is significantly less.
